

PACKAGING TOOLKIT

This week we are learning more about the various food packaging that you will find in your local supermarket. The Alexir Partnership is a food packaging manufacturer and is made up of five different businesses and each day your template and fact will be based on one of our businesses.

WHAT YOU WILL NEED:

Printer

Scissors

Paper

Glue

Colour Pencils

MAKE YOUR OWN :

White Sample -
Tree

4. ALEXIR CREATIVE FACT:

Alexir Creative makes about 5,000 carton samples a year. These carton samples help us to understand what is possible and needed for us to create our final cartons.

HOW TO MAKE:

1. Cut out the template.
2. Colour in the inside of the template using a bright colour like yellow.
3. Fold all of the fold lines.
4. Make sure that you cut the solid lines placed in between the dotted lines on the top flaps. This will allow you to insert the small side flaps in later.
5. Fold the panels and cut out the triangles on the sides. This is easily done when the panels are folded and only require two cuts.
6. Place glue on the glue flap and stick it to the opposite panel.
7. Create the base of the tree by folding the top flaps in and inserting the little flaps into your already cut holes .
